

8 REASONS TO MOVE TO QR CODE BASED DOCUMENT SECURITY

With billions of dollars of document fraud each year, customers are quickly moving towards QR code based document security.

by Rajesh Soundararajan

1 SECURITY

Once issued, the information on the document is sealed and cannot be tampered.

2 INSTANT VALIDATION

Anyone anywhere can use a mobile App to instantly validate. No network connectivity required. No pesky accounts to create. Making validation friction-free reduces document fraud.

3 NO DATABASE

All details are encoded in the code and no infrastructure maintenance is required. This not only minimizes running costs but also helps avoid database tampering prevalent with online document verification methods.

4 PAPER AND ELECTRONIC FORMATS

Often documents are presented on paper or as scanned copies and at times even as images. Qryptal works for all forms.

5 EASY INTEGRATION

Often documents are presented on paper or as scanned copies and at times even as images and a Qryptal solution works for all forms.

6 SIMPLE PRICING MODEL

No long term commitments! Just pay based on the number of documents you need to issue and scale up/down as needed.

7 STELLAR SUPPORT

We have an exceptional customer retention rate. You will wish all your vendors were so responsive and competent.

8 CERTIFICATE PDF

Option to generate fully finished, ready to print-distribute secure certificates based on your template.
